Greg Bear

BIOGRAPHY

I was born in San Diego, California, on August 20th, 1951, to Wilma M. and Dale F. Bear. My father was in the navy, and by the time I was twelve years old, I had traveled with my parents to Japan, the Philippines and Alaska, as well as touring various parts of the United States.

It was in Alaska, at age ten, that I completed my first short story. I had been writing for a year or so already. At age thirteen or fourteen I began submitting stories to the magazines, and at fifteen I sold my first short short to Robert Lowndes' FAMOUS SCIENCE FICTION. (It appeared when I was sixteen.) It took five years to sell my next story, but by the time I was twenty-three, I began selling regularly. My first novel, finished when I was nineteen, was completely rewritten and sold to Berkley some thirteen years later; the first novel I sold (HEGIRA, Dell) appeared in 1979. By order of publication, my novels are HEGIRA, PSYCHLONE, BEYOND HEAVEN'S RIVER, STRENGTH OF STONES, THE INFINITY CONCERTO (Berkley, 1984), BLOOD MUSIC (Arbor), EON (Bluejay) (1985), THE FORGE OF GOD (Tor, 1986), THE SERPENT MAGE (Berkley, 1986), ETERNITY (Warner, 1988), QUEEN OF ANGELS (Warner, 1990), ANVIL OF STARS (Warner, 1992), MOVING MARS (Tor, October 1993), SONGS OF EARTH AND POWER (Tor, 1994), LEGACY (Tor, 1995), SLANT (Tor, May 1997) and DINOSAUR SUMMER (Warner, February 1998), and FOUNDATION AND CHAOS (Harper Prism, February 1998), DARWIN'S RADIO (Del Rey/HarperCollins UK, 1999), ROGUE PLANET (Del Rey/Lucasfilm 2000), VITALS (Del Rey/Harper Collins UK, 2002), DARWIN'S CHILDREN (Del Rey/Harper Collins UK, 2003), DEAD LINES (Del Rey/Harper Collins 2004), QUANTICO (Vanguard-Perseus/Harper Collins 2005-2007), and CITY AT THE END OF TIME (Del Rey/Orion 2008).

In 1983, Arkham House published my first collection of short fiction, THE WIND FROM A BURNING WOMAN. A second collection, TANGENTS, was published by Warner Books in August of 1989. Other collections include BEAR'S FANTASIES and SLEEPSIDE.

In 1983 I was nominated for the Nebula Award for my short story, "Petra." In 1984, "Hardfought" and "Blood Music" won the Nebula Awards for best novella and novelette, respectively; "Blood Music" went on to win the Hugo Award. The novel version of that story, also called BLOOD MUSIC, won the Prix Apollo in France and was nominated for the Hugo and Nebula awards. In 1987, "Tangents" won the Hugo and Nebula awards for best short story. MOVING MARS (1993)

won the 1994 Nebula for best novel. DARWIN'S RADIO was awarded the Nebula in 2001. Both DINOSAUR SUMMER and DARWIN'S RADIO have been awarded the Endeavour for best novel published by a Northwest science fiction author.

My novels and short stories have been translated into nineteen languages: Chinese, Japanese, Russian, Italian, Czechoslovakian, French, Polish, Finnish, Swedish, Spanish, Portuguese, Dutch, German, Serbian, Korean, Croatian, Bulgarian, Hebrew, and Greek.

Occasional work as a freelance journalist has taken me to the Jet Propulsion Laboratory in Pasadena, where I covered all the the Voyager planetary encounters for the *San Diego Union*. I've written numerous articles on film for the *Los Angeles Times*. Between 1979 and 1982 I reviewed books for the *San Diego Union* Book Review supplement. My opinion pieces and nonfiction have been published in *Nature*, *Newsday* (Long Island, New York) and other journals and newspapers around the world. Many of these pieces can be found on my web site, www.gregbear.com

I've also worked as a bookseller (my last formal job was at the late, lamented La Jolla bookstore, Mithras) and I frequently lectured for the San Diego City Schools, acting as a roving teacher and conducting short classes on ancient history, the history of science, and science fiction/fantasy.

As an illustrator, my artwork has appeared on GALAXY, FANTASY AND SCIENCE FICTION and VERTEX and books both hardcover and paperback. I was a founding member of ASFA, the Association of Science Fiction Artists. My last professional work of art was the cover of my own novel, PSYCHLONE, in reprint from Tor. I do very little artwork now, devoting myself almost exclusively to writing.

With my wife, Astrid, I co-edited the FORUM of the Science Fiction Writers of America for two years. For two years, I acted as chairman of the SFWA Grievance Committee, then served as Vice President of SFWA for a year, and President for two years (1988-1990).

I consulted for the U.S. Army and the CIA on security matters in the wake of 9/11/2001. In 2000, I lectured at the FBI Academy in Quantico, Virginia, on the nature and future of crime and criminal justice. I have also delivered a talk before the American Philosophical Society (*Proceedings*, September 2004.)

Between 1983 and 1999, I served on the Citizens Advisory Council on National Space Policy, a private group organized by Jerry Pournelle, James Ransom, and

Larry Niven, consisting of scientists, military specialists, space scientists and engineers, astronauts, and writers. This group contributed substantially to the end of the Cold War and advised NASA on the future of commercial space.

I am also a consultant with the Sigma Group, established by Arlan Andrews and Colonel Doug Beason. Sigma has advised Sandia National Laboratories and Homeland Security, among others.

I have lectured and consulted at Microsoft (as well as Microsoft's Xbox division), Google, and other software companies, and served as Master of Ceremonies on a panel of health, law, and food safety experts at the 2007 International Agency for Food Protection.

Among the community awards I have received have been a distinguished career award from the Atlanta Fantasy Fair, the Inkpot from Comic-Con San Diego, and most recently, the Monty Award for Distinguished Alumni from San Diego State University.

In 1983, I married Astrid Anderson. Our son Erik was born in September 1986. Our second child, Alexandra, was born in January of 1990. All in all, we're quite a team.

Short bio: Greg Bear is the author of more than thirty books of science fiction and fantasy, including BLOOD MUSIC, THE FORGE OF GOD, DARWIN'S RADIO, and QUANTICO. He is married to Astrid Anderson Bear and is the father of Erik and Alexandra. Awarded two Hugos and five Nebulas for his fiction, one of two authors to win a Nebula in every category, Bear has been called the "Best working writer of hard science fiction" by "The Ultimate Encyclopedia of Science Fiction." His most recent novel is QUANTICO, a near-future examination of law enforcement, politics, and terror both domestic and religious. DARWIN'S RADIO and DARWIN'S CHILDREN (1999, 2003) form a sequence about viruses and human evolution and are published by Del Rey and HarperCollins UK. His stories have been collected into an omnibus volume by Tor Books. Bear has served on political and scientific action committees and has advised Microsoft Corporation, the U.S. Army, the CIA, Sandia National Laboratories, Callison Architecture, Inc., Homeland Security, and other groups and agencies.

He can be reached through his web site, www.gregbear.com.
